## **Automotive Radar Sensors in Silicon Technologies** Vipul Jain, Payam Heydari

One of the leading causes of automobile accidents is the slow reaction of the driver while responding to a hazardous situation. State-of-the-art wireless electronics can automate several driving functions, leading to significant reduction in human error and improvement in vehicle safety. With continuous transistor scaling, silicon fabrication technology now has the potential to substantially reduce the cost of automotive radar sensors. This book bridges an existing gap between information available on dependable system/architecture design and circuit design. It provides the background of the field and detailed description of recent research and development of silicon-based radar sensors. System-level requirements and circuit topologies for radar transceivers are described in detail. Holistic approaches towards designing radar sensors are validated with several examples of highly-integrated radar ICs in silicon technologies. Circuit techniques to design millimeter-wave circuits in silicon technologies are discussed in depth.

### **From reader reviews:**

#### **Greta Harty:**

The book Automotive Radar Sensors in Silicon Technologies can give more knowledge and information about everything you want. Why then must we leave the good thing like a book Automotive Radar Sensors in Silicon Technologies? A few of you have a different opinion about guide. But one aim in which book can give many data for us. It is absolutely proper. Right now, try to closer using your book. Knowledge or facts that you take for that, you could give for each other; it is possible to share all of these. Book Automotive Radar Sensors in Silicon Technologies has simple shape however you know: it has great and big function for you. You can look the enormous world by start and read a e-book. So it is very wonderful.

#### **Adam Rucks:**

The particular book Automotive Radar Sensors in Silicon Technologies has a lot of knowledge on it. So when you make sure to read this book you can get a lot of help. The book was compiled by the very famous author. Tom makes some research ahead of write this book. This kind of book very easy to read you can obtain the point easily after perusing this book.

#### **Bryant Kelly:**

A lot of e-book has printed but it takes a different approach. You can get it by internet on social media. You can choose the most beneficial book for you, science, comic, novel, or whatever by searching from it. It is named of book Automotive Radar Sensors in Silicon Technologies. You can add your knowledge by it. Without making the printed book, it can add your knowledge and make a person happier to read. It is most essential that, you must aware about publication. It can bring you from one destination to other place.

#### **Augustus Chase:**

What is your hobby? Have you heard that question when you got pupils? We believe that that issue was given by teacher for their students. Many kinds of hobby, Everyone has different hobby. Therefore you know that little person including reading or as reading through become their hobby. You have to know that reading is very important as well as book as to be the matter. Book is important thing to increase you knowledge, except your current teacher or lecturer. You see good news or update about something by book. Many kinds of books that can you take to be your object. One of them is niagra Automotive Radar Sensors in Silicon Technologies.
