The slightest tweak in history makes all the difference in its outcome... Tudor England. It is during the reign of King Henry VIII and Anne Boleyn. As her time in power nears an end, Anne is greatly disheartened by the false accusations of adultery, high treason and incest she is arrested for, and the cold-heartedness of her father for his lack of defense in her honor. Upon her death, she vows revenge on those who have wronged her, and the simple change of her death sentence from beheading to hanging grants her the opportunity to execute her wish on those who betrayed her. Unknown forces of inconceivable dark magic abounds. Anne discovers she has risen from her grave because of her denouncement of God just moments before her hanging, and resurrects two others from their untimely, wrongful deaths--her brother, George, and her favorite court musician and dear friend, Mark Smeaton. This unlikely trio will drive Whitehall Palace to madness, bringing those closest to Anne to their knees, begging for mercy and forgiveness. Once Anne executes her justice among those who have failed her, the last and final question will be whether Anne will finally have peace, or find comfort in haunting England forever.
