...addition of sulphuric acid. Example: Platinum dish and juice 34.628 Dish 24.628 Juice 20.000 Platinum dish with ash 24.737 Dish 24.628 Ash 0.109 Minus 10 per cent, allowance for sulphates 0.0109 Salts 0.0981 This multiplied by 20 and divided by 100 gives 0.3962 per cent. salts contained in the juice. 18.

Determination of the Alkalinity.--The alkalinity of thin juices must be determined frequently and is of great importance in the carbonation and sulphitation process. It is estimated with normal or tenth-normal acid by titration. (For preparation, see Chapter XV.) Phenolphthalein is generally employed as an indicator. In neutral or acid solutions this indicator is colorless but the faintest excess of an alkali produces a bright-red color. A normal acid is a solution of acid in water; and a liter contains the equivalent weight of the active element in grams. This also applies to normal alkali solutions. A normal solution of sulphuric acid therefore contains 49 grams (the molecular weight of sulphuric acid is 98) of the pure acid to the liter, hydrogen being the active element. In this case, the molecular weight must be divided by 2 in order to obtain its equivalent weight: 1. A normal solution of hydrochloric acid contains the full molecular weight (36.5 grams) to the liter, as here only one atom of hydrogen is present. In preparing a normal sodium hydrate solution (NaOH) a liter must contain 40 grams of the salt, the sodium being the active element. The alkalinity is generally determined in grams of CaO per liter of juice. As 1 cubic centimeter of a normal acid solution corresponds to 0.028 gram of CaO, the number of cubic centimeters of acid used to neutralize a certain quantity of juice must be multiplied by 0.028 in order to find the quantity of CaO. It ha...

**From reader reviews:**

**Alejandro Jones:**

Do you certainly one of people who can't read pleasurable if the sentence chained inside straightway, hold on guys this particular aren't like that. This Practical handbook for beet-sugar chemists; rapid methods of technico-chemical analyses of the products and by-products and of material used in the manufacture of beet sugar book is readable simply by you who hate the perfect word style. You will find the details here are arrange for enjoyable studying experience without leaving actually decrease the knowledge that want to offer to you. The writer involving Practical handbook for beet-sugar chemists; rapid methods of technico-chemical analyses of the products and by-products and of material used in the manufacture of beet sugar content conveys the thought easily to understand by a lot of people. The printed and e-book are not different in the articles but it just different by means of it. So , do you continue to thinking Practical handbook for beet-sugar chemists; rapid methods of technico-chemical analyses of the products and by-products and of material used in the manufacture of beet sugar is not loveable to be your top list reading book?

**Richard Segers:**

The experience that you get from Practical handbook for beet-sugar chemists; rapid methods of technico-chemical analyses of the products and by-products and of material used in the manufacture of beet sugar may be the more deep you excavating the information that hide in the words the more you get enthusiastic about reading it. It doesn't mean that this book is hard to understand but Practical handbook for beet-sugar chemists; rapid methods of technico-chemical analyses of the products and by-products and of material used in the manufacture of beet sugar giving you enjoyment feeling of reading. The article writer conveys their point in a number of way that can be understood by anyone who read it because the author of this guide is well-known enough. This kind of book also makes your own vocabulary increase well. So it is easy to understand then can go along, both in printed or e-book style are available. We highly recommend you for having this specific Practical handbook for beet-sugar chemists; rapid methods of technico-chemical analyses of the products and by-products and of material used in the manufacture of beet sugar instantly.

**Gene Kistler:**

Playing with family within a park, coming to see the marine world or hanging out with close friends is thing that usually you might have done when you have spare time, subsequently why you don't try factor that really opposite from that. A single activity that make you not sense tired but still relaxing, trilling like on roller coaster you are ride on and with addition associated with. Even you love Practical handbook for beet-sugar chemists; rapid methods of technico-chemical analyses of the products and by-products and of material used in the manufacture of beet sugar, you could enjoy both. It is good combination right, you still want to miss it? What kind of hang-out type is it? Oh occur its mind hangout people. What? Still don't understand it, oh come on its identified as reading friends.

**Shawn Mathison:**

Many people spending their moment by playing outside having friends, fun activity using family or just watching TV all day every day. You can have new activity to shell out your whole day by looking at a book. Ugh, think reading a book can really hard because you have to take the book everywhere? It ok you can have the e-book, having everywhere you want in your Smartphone. Like Practical handbook for beet-sugar chemists; rapid methods of technico-chemical analyses of the products and by-products and of material used in the manufacture of beet sugar which is getting the e-book version. So , why not try out this book? Let's view.
