Robert W. Keener

Theoretical Statistics: Topics for a Core Course (Springer Texts in Statistics) Robert W. Keener

Intended as the text for a sequence of advanced courses, this book covers major topics in theoretical statistics in a concise and rigorous fashion. The discussion assumes a background in advanced calculus, linear algebra, probability, and some analysis and topology. Measure theory is used, but the notation and basic results needed are presented in an initial chapter on probability, so prior knowledge of these topics is not essential. The presentation is designed to expose students to as many of the central ideas and topics in the discipline as possible, balancing various approaches to inference as well as exact, numerical, and large sample methods. Moving beyond more standard material, the book includes chapters introducing bootstrap methods, nonparametric regression, equivariant estimation, empirical Bayes, and sequential design and analysis. The book has a rich collection of exercises. Several of them illustrate how the theory developed in the book may be used in various applications. Solutions to many of the exercises are included in an appendix.

From reader reviews:

Mary Grays:

Book is written, printed, or created for everything. You can recognize everything you want by a e-book. Book has a different type. As we know that book is important issue to bring us around the world. Alongside that you can your reading expertise was fluently. A reserve Theoretical Statistics: Topics for a Core Course (Springer Texts in Statistics) will make you to always be smarter. You can feel considerably more confidence if you can know about almost everything. But some of you think this open or reading any book make you bored. It isn't make you fun. Why they might be thought like that? Have you seeking best book or appropriate book with you?

Andrew Nixon:

People live in this new day time of lifestyle always try to and must have the spare time or they will get wide range of stress from both daily life and work. So , when we ask do people have spare time, we will say absolutely yes. People is human not really a huge robot. Then we consult again, what kind of activity are you experiencing when the spare time coming to anyone of course your answer will certainly unlimited right. Then ever try this one, reading books. It can be your alternative within spending your spare time, often the book you have read will be Theoretical Statistics: Topics for a Core Course (Springer Texts in Statistics).

Peter Christensen:

Playing with family in the park, coming to see the ocean world or hanging out with pals is thing that usually you may have done when you have spare time, then why you don't try issue that really opposite from that. One activity that make you not experience tired but still relaxing, trilling like on roller coaster you are ride on and with addition associated with. Even you love Theoretical Statistics: Topics for a Core Course (Springer Texts in Statistics), you can enjoy both. It is excellent combination right, you still need to miss it? What kind of hang type is it? Oh can occur its mind hangout fellas. What? Still don't obtain it, oh come on its called reading friends.

Blanche Jackson:

Would you one of the book lovers? If yes, do you ever feeling doubt if you are in the book store? Try and pick one book that you find out the inside because don't ascertain book by its include may doesn't work at this point is difficult job because you are scared that the inside maybe not as fantastic as in the outside look likes. Maybe you answer might be Theoretical Statistics: Topics for a Core Course (Springer Texts in Statistics) why because the wonderful cover that make you consider concerning the content will not disappoint anyone. The inside or content is usually fantastic as the outside or perhaps cover. Your reading 6th sense will directly direct you to pick up this book.
