A History of the World in 12 Maps Jerry Brotton

“[A] mesmerizing and beautifully illustrated book.” —*The Telegraph* (London)

Maps are objects of endless fascination, and the urge to map is a basic human instinct. In this masterful study, historian and cartography expert Jerry Brotton reveals how maps—far from being objective documents—are intimately tied to the views and agendas of particular times and places. Beginning with Ptolemy’s *Geography* and ending with the satellite-powered behemoth of Google Earth, Brotton examines a dozen world maps from around the globe and through the centuries to trace the long road to our present geographical reality.

This is the kind of book map lovers and history buffs adore. Beautifully illustrated and brilliantly original, *A History of the World in 12 Maps* was a hit in the U.K. and certain to work its cartographic magic on American audiences.
