How to Trade the Highest-Probability Opportunities: Price Gaps Jeffrey Kennedy

While trading your favorite market, you spot a classic price formation: a Price Gap. Now what do you do? EWI's Senior Commodities Analyst Jeffrey Kennedy has market-tested techniques to show you how to anticipate and move on the opportunities presented by this easily identifiable market pattern.

Jeffrey has a passion for teaching, specifically to reveal his valuable trading insights such as catching and trading Price Gaps. As one of his students puts it: "Jeffrey is simply the best teacher of practical Elliott Wave Theory." With never-before-discussed strategies, Jeffrey talks about a skill set that is not in ANY book, anywhere. Watch as he discusses this vital and applicable lesson using real-time examples.

Starting off easy and moving all the way to trade setups of real opportunity, Jeffrey will teach you how to:

- Recognize the difference between the four types of price gaps.
- Utilize each of the four to anticipate critical market moves.
- Identify those gaps that you should actually ignore.
- Apply a never-before-seen technique combining Fibonacci with price gaps to project how far prices will move, and for how long.
- Use the natural price "magnets" that gaps create to help you formulate a definitive trading strategy.

Timing is crucial to any trader; Jeffrey will show you just how "timely" price gaps can be. No trader should miss this eBook.

The most valuable question Jeffrey answers will itself be a tool you can use to make a proper forecast: Will a trend continue, and for what duration? As Jeffrey himself says:

"Gaps happen all the time. The problem is knowing which gaps to ignore and which demand focus. My work, developed over the past ten years, has identified several powerful techniques to help you discover the hidden gems and skip over the unhelpful rough."
