UPDATE: SECOND EDITION - WITH ADDED CONTENT

Hollywood tends to have a romantic vision of the way war works. War is hell. This book takes a look at one aspect that has gained little attention in the modern age, the Underwater Demolition Teams, also known as the UDT. The brave men that signed up for these early teams faced real dangers that many of the modern Special Forces teams face, without much of the equipment that is carried. For many of them it was a death sentence. These were the first Navy SEALs.

Find out about the early pioneers in the field from Italy. While the Italians were not on the Allied side in WWII their ideas paved the way for other countries to develop their own teams. Italy had a different method that included torpedoes.

UDT's weren't just all about blowing things up. They also played a vital role in recon missions. Sneaking onto beaches and landing sites was dangerous work that they willingly accepted in order to help others land safely. Read about their daring New Year's Eve mission that could have saved hundreds of lives.

When called to, they enjoyed the thrill of clearing the path for other soldiers and Marines hitting the beaches, much like modern day Rangers. This was a deadly and dangerous business though. While you may have heard about the Marines being the first boots on the ground, for many battles it was the UDT that blew the obstacles out of the way for them first!

For them, war was fought on land, on sea and in the air. These UDT platoons eventually evolved into the Navy SEALs that we know today. Grab a copy of this book and see how the first Navy SEALs fought in World War 2.

Comments From Other Readers

“This is an awesome book that talks about units that you never see covered in regular education. My grandfather was injured in Ohmaha so I try to read up all I can about the actions on that beach. I was amazed to read about the history of the so called “Frogmen” that were on the beaches first. It’s truly an amazing history that the author works hard at bringing to life.” - Charlie R (New York, USA)

“This is a well-written book about the brave men of world war II. Imagine venturing into places that the average person wouldn't want to go. Imagine venturing into that same place under fire and without weapons. Imagine you're wearing nothing but swim trunks and carrying just a small dive knife. Imagine doing all this all the while knowing you may not go home. These are what the men of the Underwater Demoliton Team did time after time in WWII. This book truly brings their story to life”- Ian M (Ontario, Canada)
